The Illinois Department of Transportation is beginning a location study for an upgrade or new location of U.S. Route 34 for an approximate 25-mile segment from east of Gulfport to the Monmouth area. The study will include the evaluation of a four-lane expressway with intersections and/or a freeway with interchanges at key roads along the route.

The Illinois Department of Transportation has selected Environmental Science & Engineering, Inc. of Peoria to conduct this study that is scheduled to be completed in 36 months.

Alternative locations for this new route will be evaluated considering public input, environmental issues, access, and engineering feasibility.

The Illinois Department of Transportation welcomes and encourages public participation in this planning effort from all individuals, community groups and interested parties. As part of this process, the Illinois Department of Transportation would appreciate your response to the attached questionnaire. This information will be used in the planning process.

For more information, contact Ms. Annette Mills of the Illinois Department of Transportation. Thank you for your participation.
